Subject: Requested Cayuga Co. Well and Log Data

Isabel, Jack, and Alan --

Attached is an Excel file giving Cayuga County well data, which was inventoried by the USGS as part of our IAG with EPA Region 2. This information has been transmitted to Paul Hare at GE, as per his request. Geophysical data for gamma and caliper well logs will be transmitted as ASCII files on CD.

This is a data release with no interpretive content, for your information.

Well and Log Data

To:

cc: John H

Eckhardt/WRD/USGS/DOI@USGS,

Subject: Requested Cayuga Co.

Attached find an Excel spreadsheet with location, construction, and water-level information for the logged wells. We will forward the missing lat/longs for the DEC and EPA wells when we receive them from EPA, which should be soon. We have prepared a CD with ASCII format files of gamma, in counts/second, and caliper, in inches. Please email the address to which we should Fedex the CD.

(See attached file: Cayuga\_wellsum\_address.xls)
